

ATR PASSENGER SERVICE UNIT

MODIFICATION TO LED READING LIGHTS

Reading Light Retrofit

REDUCE YOUR MAINTENANCE COSTS!

Goodrich offers the RetroFit Kit P/N 8HG 414 402-00 for updating the ATR 42/72 Passenger Service Units to the new ATR serial standard. ATR will equip their new aircrafts with this LED Reading Lights.

This RetroFit Kit simply replace the old Halogen Reading Lights with new economical LED Readings Lights and will be offering the following advantages:

- crisp and fresh light color enhancing the appearance of the cabin
- more than 20 times increased lifetime, so "Fit and Forget"!
- easy assembly
- only one third of power consumption
- less sensitive to vibrations
- no passenger complaints about broken reading light bulbs

The RetroFit Kit 8HG 414 402-00 contains everything you need to convert your aircraft: 2 LED Reading Lights, a circuit board incl. wiring, and an assembly instruction.
